

**CARVICO'S BEST-SELLERS NOW OFFER EVEN MORE EXCITING PERFORMANCE  
WITH Xtra Life LYCRA® FIBRE**

With names that evoke breathtaking marine locations and a vast range of wonderful colours inspired by holiday locations, **Malaga, Morea, Rodi and Sumatra** are the wonderful best-selling swimwear fabrics from Carvico, the perfect expression of Made in Italy quality with its unequalled technical content, performance and style.

The timeless charmeuse, a great favourite that's the pride of the extensive Carvico range, is now more innovative than ever thanks to the use of Xtra Life LYCRA® fibre. This innovative product developed by INVISTA for the swimwear world creates unique fit, long-term shape retention, chlorine resistance – up to ten times more effective than fabrics made with ordinary stretch fibre – and high levels of protection against the damaging effects of the unsaturated acids contained in sun creams and oils. These exciting new features give Malaga, Morea Rodi and Sumatra incredible new performance for swimwear that combines outstanding looks with unique functionality.

These fabrics offer high added value, and this value is expressed through exceptional product quality and the outstanding efficiency of the services Carvico provides – prompt assistance and expert consultancy services supported by state of the art logistics. Warehouses located in Hong Kong and Australia mean rapid delivery of these extraordinary *Made in Italy* creations is always assured.

The presence of Xtra Life LYCRA® fibre makes **Carvico's four best-sellers, Malaga, Morea, Rodi and Sumatra**, even more distinctive, with a wider range of ground-breaking new benefits.

**Malaga** matt-finish charmeuse fabric is the perfect balance between lightness and stretch performance. With a fresh new colour palette every year to reflect current fashions, Malaga is now presented in 144 colours, always in stock to ensure rapid delivery. Resistant to pilling and UV rays (UPF 50+), it's the ideal swimwear solution and offers the highest technical specifications for the sports clothing sector, too!

**Weight** 190g/m<sup>2</sup>

**Composition** 80% PA - 20% Xtra Life LYCRA®

**Morea** is a light matt-finish charmeuse that provides perfect fit and total comfort. Anti-pilling, resistant to chlorine and UV rays (UPF 50+), Morea fabric is especially suitable for the production of comfy, colourful swimwear and fashion intimate wear.

**Weight** 170g/m<sup>2</sup>

**Composition** 80% PA - 20% Xtra Life LYCRA®

**Rodi**, a shiny, light charmeuse, provides outstanding protection against UV rays (UPF 50+), and excellent chlorine and pilling resistance. Rodi is especially suitable for the production of trendy glamour swimwear.

**Weight** 170g/m<sup>2</sup>

**Composition** 80% PA - 20% Xtra Life LYCRA®

**Sumatra** is a shiny fabric, resistant to pilling and abrasion and offering high levels of UV ray protection (UPF 50+). Always in stock at the warehouse to ensure just in time service, Sumatra is available in 72 colours chosen from a palette that's regularly renewed – the perfect swimwear and sportswear fabric.
