

CARVICO & JERSEY LOMELLINA at PGA 2019

On the green as for fabrics: rigour, performance and elegance

Resistance, strength, performance, elegance, flexibility: these are the main characteristics of golf, a fascinating sport loved by millions all over the world, and also the features that make the fabrics produced by Carvico and Jersey Lomellina, which are making their debut at PGA 2019, absolutely unique.

The two companies, headquartered in the district of Bergamo, leaders in the production of warp knitted and circular knitted fabrics, are taking to Orlando the made in Italy excellence applied to golf.

Light, breathable, comfortable, ideal for the creation of casual and refined, sporty but elegant garments which have always characterized the outfits of both professional and amateur golf players.

Fabrics presented by Carvico and Jersey Lomellina at PGA 2019 are high performance, and perfect to satisfy the needs of even the most demanding golf players. Extremely comfortable, they follow the body without constraining it, ensuring maximum freedom of movement: they follow every shot, every single *swing*.

The fabrics of the two companies are pilling resistant, UV protective and give garments a technical but elegant look, thanks to both their texture and colors: 3D effects, *mélange* effects, double face structures...

But not only. Fabrics by Carvico and Jersey Lomellina are safe and respectful of the environment thanks to the company policies aimed at safeguarding the planet. Water recovery, fumes treatment, independent production of energy, everything in the companies complies with a sustainable vision. And this is why VITA (Carvico) and RENEW (Jersey Lomellina) green fabrics have been created by using ECONYL®, a regenerated nylon yarn from pre and post consumer products (ghost fishing nets, carpets fluff, tulle ...) which, once they have arrived at the end of their useful life, instead of being sent to the landfill, are recovered and regenerated through complex physical-chemical decomposition processes.

Quality, technical skills, performance and eco-sustainability: Carvico and Jersey Lomellina fabrics are a winning choice for garments designed for golf, a complex and challenging sport which doesn't only require maximum rigour, but is rigour itself.

FOCUS TESSUTI CARVICO E JERSEY LOMELLINA PER PGA 2019

VITA

VITA is versatile, hyper-resistant, ultra-thin and bi-elastic, a unique mix of muscular compression and comfort. Boasting a green soul, this fabric is thin, soft and extremely moisture wicking; it is compact, UV protective and features a very high shape recovery power. Particularly suitable for the creation of comfortable and lightweight trousers which follow the body every move enabling players to feel completely free.

Composition: 78% ECONYL® Polyamide - 22% Elastane | **Width:** 150 cm | **Weight:** 190 g/m²

VITA POWER

VITA Power is VITA stronger and heavier version. Made of ECONYL® regenerated polyamide, it is heavy and boasts an exceptional recovery power. Soft, pleasant, compact and breathable, VITA Power is pilling and abrasions resistant, UV protective (UPF 50+), ensures the correct muscular compression and reduces the production of lactic acid, thus boosting a faster Energy recovery.

Composition: 78% ECONYL® Polyamide - 22% Elastane | **Width:** 150 cm | **Weight:** 225 g/m²

VITA SUEDE

VITA Suede is VITA Power brushed version, and it is also made of 78% Econyl® polyamide and 22% Elastane. It stands out for its matt look and warm, almost natural hand feel, which reminds to suede. VITA Suede is soft, compact and breathable, with a double personality and a lot of charm. Perfect for the creation of versatile and original outfits, ideal for trendy, performance garments.

Composition: 78% ECONYL® Polyamide - 22% Elastane | **Width:** 150 cm | **Weight:** 210 g/m²

VITA PL

A high performance fabric made of sustainable polyester, Vita PL is made of a 100% regenerated yarn from PET bottles, which is also the concrete evidence of its creators passion for the environment: for every kg of yarn used by Carvico to produce 4 meters of sustainable fabric 48 bottles are recycled; thus, every kg of yarn from PET bottles used, prevents 1,75 kg of CO₂ to be released into the atmosphere.

Resistant, ultra-thin and bi-elastic, Vita PL is perfect for transfer printing and for designing durable sportswear items. Vita PL is available in a wide selection of neon shade with excellent color fastness values.

Composition: 78% ECONYL® Polyamide - 22% Elastane | **Width:** 150 cm | **Weight:** 190 g/m²

REVOLUTIONAL®

A last generation performance fabric, Revolutionary® boasts an amazing matt surface. It fits the body like a second skin, it is light and ultra-thin (only 155 g/m², 50% less than classic charmeuse fabrics), extremely breathable, pilling resistant, fast drying and doesn't curl along the edges.

Perfect for the creation of comfortable and high performance, elegant and stylish sportswear, both for training or competitions.

Composition: 71% PA Micro - 29% EA | **Width:** 152 cm | **Weight:** 155 g/m²

REVONUTIONAL® ECO

The sustainable evolution of the Revolutionary® family, it is also made with Econyl®, a 100% regenerated yarn from pre and post consumer materials. Ultra thin, breathable and ultra-light, Revolutionary® Eco offers the perfect fit, models the silhouette without constraining the body, is ultra resistant to pilling and abrasions, strong, fast drying and UV protective (UPF 50+). The ideal fabric for high performance and truly eco-friendly sportswear.

Composition: 79% PA Micro Riciclata ECONYL® - 21% EA | **Width:** 152 cm | **Weight:** 175 g/m²

REVONUTIONAL® ENERGY

A performance fabric with a high shaping power, it is the heaviest member of the Revolutionary™ family. Its excellent muscular support, ensured by its extraordinary strength, helps reducing the production of lactic acid, muscle strain and enhances performance, thus it is ideal for the creation of comfortable, trendy, performance trousers. It also boasts several quality and performance certificates.

Composition: 71% Micro PA - 29% EA | **Width:** 152 cm | **Weight:** 195 g/m²

REVONUTIONAL® GLOSS

A performance fabric with a pop and glamorous look. Revolutionary™ Gloss exclusive treatment makes its surface particularly glossy, almost wet-looking, modern and charming. Its unmistakable, crispy hand feel makes it perfect for the creation of high performance, extra trendy garments.

Composition: 71% Micro PA - 29% EA | **Width:** 152 cm | **Weight:** 145 g/m²

REVONUTIONAL® MILD

An ultra light fabric – it weighs only 115 g/m² – synonymous to high quality performance. It fits the body like a second skin, and follows your every move without making you feel constraint. Beautiful and sexy, it is ideal for the creation of ton sur ton or contrasting outfits and for first layer items.

Composition: 85% Micro PA - 15% EA | **Width:** 152 cm | **Weight:** 115 g/m²

REVONUTIONAL® MORE

A high performance fabric with a high modulus which fits the body like a second skin, supports the muscles, improving sport performances, for a high impact. Hyper resistant, it protects from sun rays thanks to a UPF 50+ protection factor. It is the ideal fabric for the production of cool and dynamic garments such as comfortable and trendy performance trousers.

Composition: 79 % Micro PA - 21% EA | **Width:** 152 cm | **Length:** 70 m | **Weight:** 175 g/m²

REVONUTIONAL® SHIRO

An ultra white, high performance fabric made of polyester, ideal for transfer printing, boasting a super matt look, which enhances all printed patterns and the brightness of colors. It is also highly resistant to pilling and abrasions (scoring 5, the maximum possible value, in all tests carried out).

Composition: 80% Micro PA - 20% EA | **Width:** 152 cm | **Length:** 70 m | **Weight:** 190 g/m²

FAVOLA

Favola is lightweight, exclusive mélange fabric (ton sur ton) which fits the body like a second skin and is extremely pleasant to wear. Soft and breathable, despite being lightweight, it is compact and non see through and fits the body perfectly. Garments made with this fabric – sportswear, fitness and apparel – can shape the silhouette ensuring comfort and wellbeing. Favola is also fast drying and therefore ideal for the creation of trendy, original t-shirts.

Composition: 42% Polyamide - 42% Polyester - 16% Elastane | **Width:** 150 cm | **Weight:** 115 g/m²

FESTA

Delicate and refined, Festa is a lightweight, breathable mélange fabric (white stripes) ensuring a perfect fit, maximum comfort. Ultra-light and bi-elastic, Favola is also fast drying and pleasant TO wear in contact with the skin. Ideal for the creation of t-shirts and comfortable and stylish sportswear items.

Composition: 60% Polyester - 29% Polyamide - 11% Elastane | **Width:** 150 cm | **Weight:** 115 g/m²

FANTASIA

Featuring an exclusive mélange effect (black lines), Fantasia is extremely stylish, fits the body perfectly, and shapes the silhouette without constraints. Breathable and moisture wicking, it makes you feel comfy and dry when worn in direct contact with your skin. It boasts a delicate hand feel, perfect cover and is also fast drying.

Ideal for the creation of comfortable and elegant sportswear items.

Composition: 86% Polyamide - 14% Elastane | **Width:** 150 cm | **Weight:** 110 g/m²

3D

An ultra light piquet fabric, 3D stands out for its three dimensional look and its elasticity. Original and bon ton, 3D is extremely versatile, breathable, and fast drying and fits the body like a second skin. It is ideal for the creation of trendy, original sportswear garments.

Composition: 90% PA – 10% EA | **Width:** 150 cm | **Weight:** 215 g/m²

3D MEDIUM

A lightweight piquet fabric with a three-dimensional structure, 3D Medium is extremely elastic and versatile, the perfect mix of elegance and personality, performance and style. Being breathable and fast drying, 3D Medium is perfect for the production of activewear items and especially high performance, stylish and original t-shirts.

Composition: 93% PA - 7% EA | **Width:** 150 cm | **Weight:** 175 g/m

RENEW CULT

High performance, compact, non see-through and elastic, Renew Cult follows the body every move ensuring always the best fit. Ideal for sportswear items which are expected to be abrasions resistant, and to maintain their shape and properties even after many washes.

Composition: 82% ECONYL® Polyamide - 18% Elastane | **Width:** 160 cm | **Weight:** 170 g/m²

RENEW FINE

Compact, lightweight, soft, delicate and ultrafine, Renew Fine embraces and fits the body like a second skin. It is matt and only slightly see-through. Renew Fine is the perfect base for ultra-light, sexy and comfortable sportswear garments.

Composition: 83% ECONYL® Polyamide - 17% Elastane | **Width:** 150 cm | **Weight:** 110 g/m²

RENEW PRIME

Bi-elastic and eco-sustainable, this is the heaviest and most elastic member of the Renew family. Thanks to its compact look and modulus, it ensures a perfect fit under any circumstances and maintains its shapes and properties unaltered over time. Strong, dynamic, high performance also in its hand feel, Renew Prime offers the right muscular compression. Thanks to its elastic memory it doesn't curl on the sides and is ideal for comfortable, seamless, free cut creations.

Composition: 65% ECONYL® Polyamide - 35% Elastane | **Width:** 150 cm | **Weight:** 190 g/m²

RENEW STYLE

Matt, glamorous and stylish, Renew Style is compact and lightweight, high performance and ideal for the creation of breathable and comfortable sporty t-shirts.

Composition: 90% ECONYL® Polyamide - 10% Elastane | **Width:** 150 cm | **Weight:** 145 g/m²

RENEW SHINE

The latest addition to Jersey Lomellina collection, Renew Shine is the glossy version of the sustainable fabrics belonging to the Renew family. Soft touch, extremely comfortable and delicate, Renew Shine has an eco-friendly soul, and combines performance, elegance and femininity. Silky and stylish, it is ideal for the creation of high end, elegant sportswear.

Composition: 82% ECONYL® Polyamide - 18% Elastane | **Width:** 155 cm | **Weight:** 175 g/m²

B-FIT

An innovative double-face fabric, putting together the best features of both polyamide and polyester; polyester on the skin transport moisture to the outside, and polyamide makes it evaporate faster. Available in a bi-color version, B-fit is particularly suitable for the creation of high end fitness garments and athleisure items.

Composition: 46% PA – 38% PL - 10% Elastane | **Width:** 150 cm | **Weight:** 225 g/m²

B-NATURAL

A double face fabric, ideal for free cut creations, with a soft and comfy hand feel, putting together the natural feel of cotton and the techno-performance of polyamide. B-Natural is perfect for the creation of casualwear, fitness items and high end athleisure items.

Composition: 45% PA – 40% PL - 15% Elastane | **Width:** 150 cm | **Weight:** 220 g/m²

B-FASHION

An innovative double face fabric made of polyamide, which is absolutely unique since it boasts one piece-dyed fabric on one side and a black mass dyed fabric on the other. This special structure makes it ideal for the creation of exceptionally bright color matches. The black side doesn't affect the colored side, doesn't bleed and doesn't fade.. B-Fashion follows the body every move and is ideal for the creation of pants, sportswear, fitness items and trendy out wear garments.

Composition: 84% PA – 16% PL | **Width:** 150 cm | **Weight:** 215 g/m²
